

HOME CARE: MONITORING

With over 30 Years in business to the Aged Care Market we are pleased to offer the same assistance to Carer's looking after people in the home suffering from conditions such as dementia.

Affordable and easy to use, giving peace of mind for Carer's sensitively yet with the utmost care for safety.

You choose the best equipment for your situation, begin with one of 3 different monitors and then choose the kind of alarms to suit your situation. Or start with our 'Monitoring Basic Kit' (see website for brochure) and add to that if required.

You will be able to monitor the movement of the person, even go out to put washing on the line confident that you are aware when the person gets up from a nap, up from watching TV or tries to enter a room or exit a door they shouldn't. You get peace of mind without being intrusive to the person you care for.

The Smart Caller 'Home Care Monitoring' system is a low cost mini nurse call system for the home.
